ECONOMIC POLICY

1. Kelkar, Vijay

In service of the republic: The art and science of economic policy / by Vijay Kelkar and Ajay Shah.. - Haryana: Penguin Random House, 2019. xiii,425; ISBN : 978-0-670-09332-8. 338.9 K27I Q9 50980

Book Description: As a \$3-trillion economy, India is on her way to becoming an economic superpower. Between 1991 and 2011, the period of our best growth, there was also a substantial decline in the number of people below the poverty line.

Since 2011, however, there has been a marked retreat in the high growth performance of the previous two decades.

What happened to the promise? Where have we faltered? How do we change course? How do we overcome the ever-present dangers of the middle-income trap, and get rich before we grow old? And one question above all else: What do we need to do to make our trust with destiny?

As professional economists as well as former civil servants, Vijay Kelkar and Ajay Shah have spent most of their lives thinking about and working on these questions. The result: *In Service of the Republic*, a meticulously researched work that stands at the intersection of economics, political

philosophy and public administration. This highly readable book lays out the art and the science of the policymaking that we need, from the high ideas to the gritty practicalities that go into building the Republic.

ECONOMICS

2. Towse, Ruth

Textbook of cultural economics / by Ruth Towse.. - ed. 2. - Cambridge: CUP, 2019. xxix,695; ISBN : 978-1-108-43200-9. 381.457 T66T Q9 50958

Book Description: Now in its second edition, *A Textbook of Cultural Economics* is an established resource for many courses, including economics of the arts, the cultural and media industries, and the digital creative economy. Authored by Ruth Towse, a widely recognised expert in cultural economics, the book offers a comprehensive, up-to-date overview and analysis of the field in the digital era. Written in an accessible style, and with

suggestions for further reading, it covers a range of topics, from the more traditional arts to the creative industries (such as music, film, games, broadcasting, and publishing), as well as the economics of artists' labour, markets and copyright. This second edition considers the creative economy up to the present, emphasising the role of digitisation across the creative industries. It will appeal to students taking courses in the economics of art and culture, and can also be used in courses on arts management and cultural policy.

ELECTRICITY

3. Cretì, Anna

Economics of electricity: Markets, competition and rules / by Anna Cretì and Fulvio Fontini.. - Cambridge: CUP, 2019. xvii,350;

ISBN : 978-1-316-63662-6.

333.7932 C86E Q9 50959

Book Description: This comprehensive and up-to-date book explains the economic rationale behind the production, delivery

and exchange of electricity. Cretì and Fontini explain why electricity markets exist, outlining the economic principles behind the exchange and supply of power to consumers and firms. They identify the specificities of electricity, as compared to other goods, and furthermore suggest how markets should be optimally designed to produce and deliver electricity effectively and efficiently. The authors also address key issues, including how electricity can be decarbonized. Written in a technical yet accessible style, this book will appeal to readers studying power system economics and the economics of electricity, as well as those more generally interested in energy economics, including engineering and management students looking to gain an understanding of electricity market analysis.

INDUSTRY

4. Political economy of defence / edited by Ron Matthews.. - Cambridge: CUP, 2019. xxi,501;

ISBN : 978-1-108-44101-8.

338.47355 M43P Q9 50963

Book Description: Defence is the ultimate public good, and it thus falls to government to determine the appropriate amount of public revenue to commit to the defence of the realm. This will depend on history, strategic threat, international security obligations, entreaties from allies and, of course, the threat faced. The Political Economy of Defence is structured to identify, explain and analyse the policy, process and problems that government faces from the starting point of national security through to the ultimate objective of securing a peaceful world. Accordingly, it provides insights into how defence budgets are determined and managed, offering relevant and refreshingly practical policy perspectives on defence finance, defence and development trade-offs, sovereignty vs globalisation debates, and many other pertinent issues. It will appeal to policymakers, analysts, graduate students and academics interested in defence economics, political economy, public economics and public policy.

5. Bhattacharyya, Partha Sarathi

When coal turned gold: The making of a Maharatna company / by Partha Sarathi Bhattacharyya.. - Haryana: Penguin Random House, 2018. xxvi,181; Foreword by Pranab Mukherjee. ISBN : 978-0-670-09076-1. 338.27240954 B46W Q8 50981

Book description: Coal India Ltd (CIL) contributes to about 82 per cent of India's coal production. In *When Coal Turned Gold*, former chairman and managing director of CIL, Partha Sarathi Bhattacharyya, tells the story, warts and all, of how he dealt with the Dhanbad coal mafia, how he changed the way the industry was perceived, how he dealt with the trade unions and the government and, most importantly, how he was able to script one of the greatest success stories the country had ever seen.

INEQUALITY

6. Tanninen, Hannu

Inequality and optimal redistribution / by Hannu Tanninen, Matti Tuomala, Elina Tuominen.. - Cambridge: CUP, 2019. 92; (Elements in public economics) Cambridge elements. ISBN : 978-1-108-46911-1. 339.22 T15I Q9 50961

Book Description: From the 1980s onward, income inequality increased in many advanced countries. It is very difficult to account for the rise in income inequality using the standard labour supply/demand explanation. Fiscal redistribution has become less effective in compensating increasing inequalities since the 1990s. Some of the basic features of redistribution can be explained through the optimal tax framework developed by J. A. Mirrlees in 1971. This Element surveys some of the earlier results in linear and nonlinear taxation and produces some new numerical results. Given the key role of capital income in the overall income inequality, it also considers the optimal taxation of capital income. It examines empirically the relationship between the extent of redistribution and the components of the Mirrlees framework. The redistributive role of factors such as publicly provided private goods, public employment, endogenous wages in the overlapping generations model and income uncertainty are analysed.

LAW

7. Bannister, Judith

Government accountability: Australian administrative law: Sources and materials / by Judith Bannister and Anna Olijnyk.. - Cambridge: CUP, 2018. xxvi,438; ISBN : 978-1-316-64397-6. 342.9406 B22G Q8 50960

Book Description: Government Accountability: Australian Administrative Law Sources and Materials is a companion text to the second edition of Government Accountability: Australian Administrative Law. The casebook follows the structure of the textbook and provides a sophisticated and in-depth introduction to the principal areas of administrative law taught in Australia. Extracts from primary materials – including cases, legislation and judicial review – provide readers with an understanding of the key principles of administrative law and demonstrate how these mechanisms operate in practice. Case extracts provide a clear account of the facts, issues and statutory provisions considered by the courts. Extracts from secondary sources, including from parliamentary reports and publications by leading commentators in this field, further elucidate key concepts and controversies. Written by experts with substantial teaching and

research experience, this is an essential text that will equip students with the tools to think critically and successfully apply the law to practice.

8. Crossley, Penelope

Renewable energy law: An international assessment / by Penelope Crossley.. - Cambridge: CUP, 2019. xxxii,269; ISBN : 978-1-107-18576-0. 346.046794 C88R Q9 50984

Book Description: With the rapid growth of the renewable energy sector, it has become increasingly important to understand how renewable energy is defined in national laws around the world and what regulatory mechanisms these countries are deploying to achieve their renewable energy goals. In *Renewable Energy Law: An International Assessment*, Penelope J. Crossley compares the national renewable energy laws for each of the 113 countries that have such a law, shedding light on the question of whether energy laws are converging globally to facilitate trade or

engaging in regulatory competition. The book includes over sixty extracts from different national laws, case studies on the European Union and the Chinese wind sector, and many examples of the particular challenges facing specific countries. This work should be read by scholars, policymakers, regulators, employees of commercial entities operating in the energy sector, and anyone else interested in the legal and regulatory landscape of renewable energy.

MACROECONOMICS

9. Hoekstra, Rutger

Replacing GDP by 2030: Towards a common language for the well being and sustainability community / by Rutger Hoekstra.. - Cambridge: CUP, 2019. xxvii,341; ISBN : 978-1-108-73987-0. 339.31 H67R Q9 50962

Book Description: How did Gross domestic product (GDP) become the world's most influential indicator? Why does it still remain the primary measure of societal progress despite being widely criticised for not considering well-being or sustainability? Why have the many beyond-GDP alternatives not managed to effectively challenge GDP's dominance? The success of GDP and the failure of beyond-GDP lies in their underlying communities. The macro-economic community emerged in the aftermath of the Great Depression and WWII. This community formalised their 'language' in the System of National Accounts (SNA) which provided the global terminology with which to communicate. On the other hand, beyond-GDP is a heterogeneous community which speaks in many dialects, accents and languages. Unless this changes, the 'beyond-GDP cottage industry' will never beat the 'GDP-multinational'. This book proposes a new roadmap to 2030, detailing how to create a multidisciplinary Wellbeing and Sustainability Science (WSS) with a common language, the System of Global and National Accounts (SGNA).
